

eTHREAT CONSULT

CRISIS MANAGEMENT CONSULTANTS, INC.

THE CHALLENGE: Quick, professional, and cost-effective threat of violence consultation for human resource managers.

THE SOLUTION: Crisis Management Consultants, Inc.'s new eThreat Consult service. CMC, Inc. professionals train select members of your staff how to complete the Risk of Violence Consultation Request and the Workplace Risk of Violence Assessment Questionnaire (WRVAQ). The WRVAQ is a copyrighted, research-based tool designed to help you gather and focus your knowledge regarding a threatening person.

Spot Violence

When you are concerned about a threatening employee or other menacing person, and wish to consult with CMC, Inc. you complete and submit the consultation request and the WRVAQ electronically via our secure website. We, at CMC, Inc., analyze this information and then offer risk estimates based upon a logical analysis of dispositional, historical, contextual, and clinical risk factors that research has shown to be related to such assessments.

eThreat Consult is designed to develop a preliminary estimate of the risk of violence, to judge the need for a more thorough risk of violence evaluation, and/or to develop other recommendations as appropriate.

Stop Violence

The cost of training is \$800.00, requires approximately three hours, and can be preformed at your location. The cost of eThreat Consultation is \$500.00 per occurrence.
