

eTHREAT CONSULT

CRISIS MANAGEMENT CONSULTANTS, INC.

Spot Violence

Stop Violence

THE CHALLENGE: Quick, professional, and cost-effective threat of violence consultation for school administrators and counselors.

THE SOLUTION: Crisis Management Consultants, Inc.'s new eThreat Consult service. CMC, Inc. professionals train select members of your staff how to complete the Risk of Violence Consultation Request and the Juvenile Risk of Violence Assessment Questionnaire (JRVAQ). The JRVAQ is a copyrighted, research-based tool designed to help you gather and focus your knowledge regarding a particular troubled youth.

When you are concerned about a troubled youth and wish to consult with CMC, Inc. you complete and submit the consultation request and the JRVAQ electronically via our secure website. We, at CMC, Inc., analyze this information and then offer violence risk estimates based upon a logical analysis of dispositional, historical, contextual, and clinical risk factors that research has shown to be related to such assessments.

eThreat Consult is designed to develop a preliminary estimate of the risk of youth violence, to judge the need for a more thorough risk of violence evaluation, and/or to develop other recommendations as appropriate.

The cost of training is \$800.00, requires approximately three hours, and can be performed at your location. The cost of eThreat Consultation is \$400.00 per occurrence. Call 405.949.9235 for more

details.
